To

C.S. Balasundaram Iyer Esqr., B.A.,

Offg.Secretary to the Govt. of H.H. the

Maharaja of Mysore, Genl.& Rev.Deptts.,

Bangalore.

SIR,

With reference to Government Order No.10590-602 med 297-06-1, dated May 13th 1907, regarding the proposal to open Vaidya--salas in certain places in the State, I would beg to state that my views on this subject are entirely in accord with those expressed by the Inspector General of Education in his No.8567/723 of May 16th last.

I would however in this connection further mention that I have had opportunities of seeing the work done by men trained in this college who have been given charge of such Institutions in different parts of this State, and my invariable experience of them has been that they were never to be found when I wished to see what they were doing! and I fear that the public utility of any such has been greatly exaggerated by their instigators, they do not command the patronage from the sick poor that they did some years ago and finding this I have heard of some instances where Eu--ropean drugs have been incorporated with Indigenous drugs

and

and given in mixtures, pills etc., to the sick, which real-ly constitutes a system of charlatanism and quackery, which I trust this State will never officially countenance. More-over it would seem to me to be a wrong policy to adopt, after having expended so much upon trying to inaugurate & popularize European methods of Medicine and Surgery, the latter of which of course does not find any actual place in their system at all, and it would, if adopted, as the -- Inspector General od Education rightly and aptly remarks, be putting back the hands of the clock of time many hundreds of years, and that too in order to satisfy the prejudices possibly of a few, as such, I am convinced, could not be by general request, for our modern and scientific methods, as adopted in European medicine and surgery, are vastly ap-preciated by the masses of this country as I have very -- good reason to know from a very varied experience in this matter of all parts of this Empire. In conclusion, I re-peat that it would, in my opinion, be a most retrograde -- step for an enlightened Government, such as ours, to take in this the twentieth century, and a most dangerous experiment to make on other just as important grounds into which it is needless for me to enter here. I can only sincerely hope that this matter will be seriously reconsidered before any of the proposals mentioned are allowed to take shape.

I have the honor to be,

Sir,

Your most obedient servant,

H E Drake-Brockman

Major I.M.S.

Senior Surgeon and Sanitary Comm'r.M.G.
